## 4) On the home page, you can search for courses in different ways.

The screenshot displays the MCIU course homepage. At the top, a search bar is labeled with a red circle '1'. Below it, the user is welcomed as 'Trevor Test'. On the left, a sidebar menu is labeled with a red circle '2' and contains categories like 'Content', 'IDEA Supported', 'Meetings, Councils, & Networks', 'Student Events', and 'Trending'. The main content area shows three course listings: 'MCIU PIIC Networking Meeting', 'Montgomery County ESL Teacher Network Meeting', and 'MCIU PIIC Networking Meeting'. Each listing includes details such as start date, session number, pricing, location, status, and class size, along with an 'Add to cart' button. A 'Browse Courses' button is visible in the top right corner.

Home > All > Using GeoGebra to Discover, Remediate, Differentiate and Assess Student Learning with Tim Brzezinski

**Using GeoGebra to Discover, Remediate, Differentiate and Assess Student Learning with Tim Brzezinski**

GeoGebra is a platform for discovery learning, a resource for meaningful remediation, a tool to differentiate instruction and a source for ongoing formative assessment. Join us for a 2-day event with Tim Brzezinski to actively experience several examples of dynamic learning environments where GeoGebra can serve as a primary tool to foster active, student-centered, discovery-based learning. In addition, participants will experience how GeoGebra can serve as a secondary tool for meaningful remediation that conceptually reinforces student discovery of previously learned concepts. As participants engage in these dynamic lesson activities, they will also experience how GeoGebra can simultaneously differentiate and help formatively assess students' understanding of concepts. Participants will also have an opportunity to construct new GeoGebra resources to foster future active, engaging, discovery-based learning environments for their students.
